METASYS

Unlock the future of building automation

The world's smartest BAS just got smarter
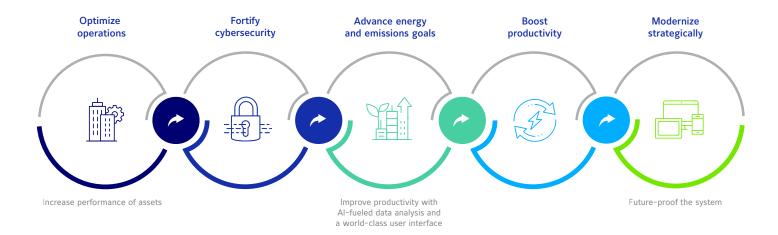

Why upgrade now?
It's time to thrive

The Metasys® Building Automation System is the foundation of building management energy efficiency. The world-class technology connects multiple systems on a single platform, giving you the information you need to make smarter, faster and more efficient decisions.

Johnson Controls helps you eliminate complex detective work to run your facility. Upgrade to the latest Metasys software for clear, straightforward operation.

The latest version of Metasys
empowers you to:

- Avoid breakdowns and unplanned downtime: Data-driven guidance helps you spot issues early and resolve them faster

- Fortify your cybersecurity: Upgrades help protect systems and keep your security a step ahead

- Improve occupant comfort: Consistent uptime means occupants are kept safe and comfortable

- Connect into other building systems seamlessly: See what's happening across all your building systems from one place

- Modernize affordably: Get the Metasys interface for engine-only installations, transitioning from end-of-life legacy systems

Elevating your building
with the Metasys upgrade

Optimize operations   **Fortify cybersecurity**   **Advance energy and emissions goals**   **Boost productivity**   **Modernize strategically**

Increase performance of assets

Improve productivity with AI-fueled data analysis and a world-class user interface

Future-proof the system

Optimize operations

Reduce the risks of disruptions and downtime. Metasys empowers your team to spot potential issues early and resolve them faster, increasing operational resiliency and keeping occupants safe and comfortable. Options like our Connected Controls Service include expert assessment of BAS diagnostics to make service calls more efficient. Get the data you need to improve building performance and extend asset life. And it's all optimized for mobile viewing and secure remote access.

Fortify cybersecurity

Help protect building systems and data from ever-evolving cyber threats. Metasys incorporates industry and government best practices—and keeping your system up to date means your staff won't waste time searching for temporary patches or obsolete fixes. The award-winning Cyber Health Dashboard enables system admins to understand and address potential cybersecurity risks from wherever they are. Get clear information in a streamlined, easy-to-digest format that empowers you to take action.

Advance energy and emissions goals

Deliver comfortable, efficient, compliant spaces with less effort. Leverage advanced analytics, AI-powered algorithms and digital twin technology to reduce energy consumption and minimize environmental impact. Metasys includes powerful tools not available with older technology to streamline compliance reporting and measure progress against energy use, net zero and comfort goals and regulations.

Boost productivity

Reduce the time and effort needed to manage and maintain building systems. Metasys navigation is intuitive—new users can learn in five minutes and access critical data in just a few clicks. Customizable dashboards and add-ons like Fault Detection and Fault Triage help your team determine quickly what to do first.

Modernize strategically

Metasys is a true integrations platform to unify even non-HVAC systems, enabling you to do more with less. And you can upgrade affordably with tailored financing solutions and options like the Managed Metasys hosted server, an economical subscription service delivering server benefits without the upfront investment, operating and security concerns.

Get started now

Upgrade to the latest Metasys, and take your building into tomorrow. Ask your account manager for a demo, or learn more at johnsoncontrols.com/campaigns/metasys.
