Johnson Controls

Product Security Advisory

July 21, 2022

JCI-PSA-2022-04
CVE-2021-36200
ICSA-22-202-02

Overview
Johnson Controls has confirmed a vulnerability impacting Metasys ADS/ADX/OAS with MUI. The vulnerability allows unauthenticated users of a web API to enumerate users of a Metasys ADS/ADX/OAS with MUI server under certain circumstances. Users should update their Metasys ADS/ADX/OAS products by applying a patch.

Impact
Under certain circumstances an unauthenticated user could access the Metasys ADS/ADX/OAS with MUI web API and enumerate users.

Affected Versions
- All Metasys ADS/ADX/OAS 10 and 11 versions with MUI are impacted.

Mitigation
- Update all Metasys ADS/ADX/OAS 10 versions with patch 10.1.6.
- Update all Metasys ADS/ADX/OAS 11 versions with patch 11.0.2.
