

Johnson Controls is Powering the COVID-19 Crisis Response

Security Solutions and Capabilities for Healthcare

Johnson Controls is committed to serving the healthcare community during the COVID-19 crisis. Healthcare facilities are facing a large influx of patients, staff and visitors as the COVID-19 crisis unfolds.

This means having to rapidly verify who is within their system, track their current location and control access to critical areas.

These facilities need rapid access to design, engineering, installation and programming resources that Johnson Controls has in place and available now. Facilities need to:

- Quickly issue credentials
- Screen visitor and patient arrivals for both for identity and safety
- Provide panic and alarm capabilities that can provide location details for staff
- Rapidly create access control points and configure changing locations as sites evolve
- Enable instant remote monitoring of both systems and site details

We have proven to be a cornerstone of America's Healthcare infrastructure

- Johnson Controls solutions are in nearly 85% of North American hospitals
- 120 branch locations in North America supported by 25,000 employees
- Recognized by federal, state and local governments as a provider of essential products, services and personnel

Johnson Controls is securing hospitals across North America

- Installed security systems within 6 days enabling new ICU space to be available in less than 10 days
- Remotely conducted physical security server upgrades ensuring necessary equipment capacity to support additional staff, visitors and equipment expected as case loads increase
- Same-day security set-up at temporary patient intake screening site

The power behind **your mission**

COVID-19 Security Crisis Response

Some of the ways Johnson Controls can support your security needs:

Maximize safety for staff and patients	<ul style="list-style-type: none">• Rapid security equipment installation for temporary external screening and patient intake structures• Thermal video cameras to assess temperature of those entering site for symptoms	<ul style="list-style-type: none">• Panic buttons, badges or mobile phone apps for staff to indicate duress• Real time tracking of staff that have initiated duress signals to enable fast response
Provide credentials for new staff and patients	<ul style="list-style-type: none">• Rapid access control and visitor management set-up	
Monitor security of the healthcare system	<ul style="list-style-type: none">• Remote security monitoring of video, intrusion and access control• Remote Service enables Johnson Controls to diagnose and resolve many system issues quickly over the phone, avoiding the inconvenience of scheduling and dispatching a service technician onsite	<ul style="list-style-type: none">• Access control and video surveillance to enable remote monitoring via the Cloud
Implement security systems to monitor supply levels and secure supplies and equipment	<ul style="list-style-type: none">• RFID, RTLS asset-tracking for advanced equipment security• Access control to prevent equipment theft	<ul style="list-style-type: none">• Video surveillance systems for 24/7 facility monitoring

Johnson Controls can rapidly mobilize technical resources – including engineers, project managers, installers and service technicians for security systems – and expertise for projects and onsite assessments.

Backed by our global Centers of Excellence, we can immediately bring world-class expertise to your local crisis response site.

Financing options available through Johnson Controls can help you preserve valuable cash and improve the safety of your facility.

Our experts will listen to your healthcare needs and quickly respond with solutions, services and expertise to power your mission.
