

# Xaap

## The compliance platform designed for building managers

Xaap is a Software-as-a-Service (SaaS) solution that provides a single, centralized platform for building compliance data. With convenient online access, building managers can maintain, track, and ensure system compliance, and manage their reporting needs.

### Multiple inspector

Allows multiple inspectors working towards the completion of a report in near real-time.

### Offline mode

Inspectors can continue their inspection process even when connectivity is reduced or non-existent.

### Barcoding

Keep track of your assets through associating them and testing them with barcodes.

### Gateway

Near real-time data feed from Simplex U and ES systems for device inventory and alarm activity, and select panel commands directly from the mobile phone.

### Permission structure

If you have subcontractors or employees that should only access certain devices in a building, Xaap allows you to control their access.

### Images for deficiencies

When deficiencies are found during the inspection, the inspector can capture pictures for additional documentation of the deficiency on the report.

The power behind **your mission**

### Historical report repository

All reports generated in Xaap can be easily retrieved through our online web application.

### Ready-to-use report templates

Out-of-the-box TJC, DNV and NFPA: 10, 15, 25, 72 report templates available with your purchase of Xaap.

### Digital signature capture

Customers and inspectors have the ability to sign directly on the mobile app for image capture on the report.

### Inventory management

Xaap automates the inventory tracking procedure, reducing the amount of work needed to monitor and track the device inventory in TJC and DNV environments.

### Customizable report templates

If our existing report templates don't meet your needs, you can make customizations, including new or edited questions, different report layout, and even custom logos.
